In a frame, I want to remove all the samples below a certain frequency threshold. Then I want to concatenate all the frames together. My problem is that if I use the code I've made so far, the code doesn't behave as it should and concatenates the frames together without removing the samples under the threshold. My frequency cut-off is 16500Hz. Here's my code. short AudioInput[16]; short AudioOutput[16]; short *A; int size=sizeof(AudioInput); long i; double freq; FILE *outfile; double cut_off_freq; double cut_off_index; double 82157476af
