Machi's server,'sidescrolling'. We Need Help :) Release Schedule First Video. First Video. Hi everyone, I'm Matt from the crew over at machic. Here's a quick video walk through showing off the current state of machic. We've had some changes in the last few weeks, so before the next video I'd like to cover a few things you should know: Releases There will be two major releases per week, with small releases in between as well. The video explains this a bit further. Here's a quick description of the major and minor releases: Main Release: Game/Presentation changes Minor Release: More graphical changes, fixes, etc. The first video gives you a quick look at the art style. Once we finish the art style, we're aiming to have the second video out by end of week. The Characters The character art is still very rough, but this is where I would like to get feedback from you. At the moment, we're looking to create 8 characters, with 8 that are common gender and 8 uncommon gender. The gameplay on the

character creation screen will be up to you. If you'd like to try playing a character in-game (all players can), you may simply type "character" into the chat (default: /character) and start playing. There's also a button on the character creation screen that'll allow you to skip the rest of the creation process and just play a character, which is handy if you have trouble with it. The animations will be shown in the first video once they're in. A note on artwork for Steam, etc: There is a large chance we will upload all of the artwork to a different service, Steam included. You can still get ahold of it, however. To access, click the steam link and go to the last step of the process, where you'll be given the option to download the zip files. These zip files include the artwork as well as the complete graphics/textures. Once the artwork has been done, I'll compile a list of all of the possible names for the characters. If you want to have a say, you may also suggest names. The characters in the video are not necessarily all the characters in the final game. The characters in the first video are not necessarily all the characters in the final 82157476af
