For the most parts i enjoyed. :). Whatever happened to between Tekken 6 and 7 for Julia to turn from a intelligent, serious, mature and decent girl into a stupid, ditzy and shrill voiced airhead.

I guess Harada couldn't get enough of Lucky Cloe that they had to ruin one of the greatest Tekken 7 characters of all time. And all this time I have been looking forward to Julia DLC.

Moral of the story never buy season pass or Delux Edition.. Very good story and deeply thought provoking. I wish it gave you the option of making your own decisions but then you wouldn't get the great ending. At the end I felt like this is the start of a great future for this game. I want to be this person and continue with more of an open game and more game playing mechanics.. not much to do but its okay. The menus are not too easy to navigate. The auto save feature keeps going off like less than every five minutes, with no way to disable it. When and if these fixes get implemented, I would gladly give it a good rating.. You run around town breaking into buildings and licking everything. So basically just any normal day for me.

Has a lot of potential. I like the transitions between space exploration and internal fights a lot. It feels like it needs to be a little smoother and maybe a tad slower... I don't mean the action or the fights... just the pacing and the movement. At this point I can't recommend it but I want to see it improve!. Great wave-based shooter for Vive/SteamVR. More arcade-y than the popular Space Pirate Trainer, but a bit more enjoyable for me. Enemies come from anywhere (360-degrees) around you. Aiming accuracy is good, and the reloading mechanism feels great.

For its price, this should be an insta-buy for anyone with a Vive. Seriously, just do it. It's loads of fun.. Pretty good story. Haven't really finished a game from start to end in a while but this one kept me going.

Story is good, loved all the details and extra side-things I was able to find.

There's a couple bugs that either prevent you from finding a correct solution (had to use a Steam Guide for one of them due to a bug, and sometimes the windows flicker like crazy, sometimes the input hangs, etc). But aside from these issues, it was a fun story to play through. Would recommend!. Not the greatest shooter ever but for 1.64€ it produces some fun for an hour.

Control is responsive. Game does not hide its nature. It is short but that's ok. What you see is what you get and I respect the devs no BS store page.. simple but addictive pick up and play shmup, cool music too and a steal at the price, defo add to your steam shmup collection. cool for the money

. Terrible game that makes no sense in the worst way possible. everything has to be done in a certain order that doesn't make sense. you need the walkthrough to figure it out which then allows you to complete the game in less than 5 minutes (provided you can click fast enough to do some of the things that require autoclicking program caliber clicking speeds). Do not get this game unless you enjoy house pets killing themselves for no apparent reason.. sneak thief is an amazing game, but in some things here and there to make the game amazing(: (so I recommend doing that). chi chi chi ha ha ha. You get what you paid for, 5K achievements at minimum price. If you're an achievement hunter looking to increase the number of achievements on your profile showcase, then I highly recommend buying this. Else don't waste your money. This is not a game, it's just a way of distributing achievements.
